

CEXEC wins Information Technology Contract FAA BITS II Award

CEXEC is pleased to announce a contract award, DTFAWA-03-D-03026, on June 24, 2003, under the Federal Aviation Administration's Broad Information Technology and Telecommunications Services (BITS II) competition to Trios Associates Inc. CEXEC is a member of this powerful and versatile team. Among 34 awardees, the Trios team scored second in Technical rating.

The BITS II contract is an Indefinite Delivery Indefinite Quantity (IDIQ) Government Wide Acquisitions Contract (GWAC) with fixed labor rates. Federal government purchasers can procure Information Technology and telecommunications support services in a very streamlined manner, often within 2-4 weeks. The contract period of performance is 8 years. The base period is June 24, 2003 to September 30, 2004, with 7 one-year following options, ending on September 30 2011.

FAA Program Offices and customers from other federal agencies may order the following types of services via the BITS II contract: Information technology, telecommunications, and administrative, technical and analytical support services for all types of program management functions, including telecommunications & IT systems and services, system engineering & design functions, software development functions, system procurement and life-cycle management functions, system development functions, training and documentation functions, risk assessment and disaster & contingency planning functions, emerging technologies, and security functions.
